I am a subscriber to XM radio as well as an employee of a company that produces hardware for the service. I am 100% against NAB's petition 04-160. In my opinion, this would violate the very essence of our free market society. Businesses should stop using the federal government to remove competition. XM radio is a superb service and obviously meets a demand from the buying public that was not available from existing services. Not only does XM provide a wonderful service, but it is creating jobs which are desperately needed in this depressed economy.
